Far out in the uncharted backwaters of the unfashionable end of the western spiral arm of the Galaxy lies a small unregarded yellow sun. Orbiting this at a distance of roughly 92 million miles is an utterly insignificant little blue green planet whose apedescended life forms are so amazingly primitive that they still think digital watches are a pretty neat idea. This planet has a problem. which was this: most of the people on it were unhappy for pretty much of the time.
